

Turning for the Office

TURMKREISEL & SPINNING TOP

In this demonstration, a tower spinner (turmkreisel) is turned. This unique desk toy has a top which eventually tips over and stays on the tower, ready for the next spin. Next, a traditional spinning top is turned, this one with a small bowl to spin it in.

This demo focuses on tool use techniques and exploring precision turning. No specialized tools are used—just the standard equipment most turners already have. Get ready to enjoy a fun and unique toy turning demo!
