

# KLEIN FLASCHENFORM TURMKREISEL

In this class, we will turn a small (klein) German spinning top known as a tower spinner (turmkreisel), featuring a distinctive bottle-like shape (flaschenform). For intermediate and advanced turners, this class focuses on refining techniques and exploring precision turning. No specialized tools are required—just the standard equipment most turners already have. Get ready to create a fun and unique toy while honing your skills!
