

TURMKREISEL & SPINNING TOP SET

A tower spinner or 'turmkreisel' is a traditional German woodturned toy. This unique desk toy has a top which eventually tips over and stays on the tower, ready for the next spin. Next, a spinning top is turned along with a small bowl to spin it in.

This demo focuses on tool use techniques and exploring precision turning. No specialized tools are used—just the standard equipment most turners already have. This is a fun and unique toy turning demonstration.
